## **Bank of San Francisco Reports Results for the Third Quarter of 2017**

SAN FRANCISCO, CA – (11/28/2017)—Bank of San Francisco, a modern community bank serving the Bay Area, announced unaudited results for the third quarter ended September 30, 2017 with net income of \$496,000, a 24% increase compared to the prior quarter, and an increase from \$490,000 earned in the third quarter of 2016.

“The Bank had a solid third quarter marked by higher profits and strong deposit growth. With the expansion of our relationship management team and a robust pipeline, we are moving forward in executing our accelerated growth plan,” said Wendy Ross, President, Bank of San Francisco.

### Financial Highlights:

- Net income was \$496,000 for the third quarter of 2017, compared to \$400,000 for the preceding quarter and \$490,000 for the third quarter of 2016. Results for the third quarter included gain on sale income of \$75,000 from the sale of SBA loans, versus \$190,000 in the preceding quarter and \$247,000 in the third quarter of 2016.
- Net interest income was \$2,524,000 for the third quarter of 2017, an increase of \$211,000 over the preceding quarter and \$364,000 over the \$2,160,000 achieved in the third quarter of 2016. The 17% increase over the prior year like quarter reflects the increased revenue from our continued loan growth and the impact of the rate increases by the Federal Reserve. Net interest margin decreased in the third quarter to 3.94% from 4.00% in the second quarter 2017, due mainly to higher levels of average Liquid Assets carried during the quarter.
- Operating expenses were \$1,756,000 for the third quarter of 2017, an increase of \$12,000 over the preceding quarter and an increase of \$133,000 over the \$1,623,000 reported for the third quarter of 2016. Higher compensation, reflecting four full-time additions to staff, contributed to the increase in operating expenses in the third quarter of 2017. Although operating expenses increased in the third quarter of 2017, the efficiency ratio improved as income growth outpaced expense growth.
- Basic earnings per common share were \$0.33 for the quarter, up \$0.06 from the prior quarter and flat compared to the third quarter of 2016. Diluted earnings per common share were \$0.33 for the quarter. The Bank adopted its first equity incentive plan in 2017 and granted 21,714 shares of restricted stock with a three-year vesting as of September 30, 2017.
- Total Loans, net of deferred fees, were up \$2 million from June 30, 2017 and up \$23 million from September 30, 2016. Loan growth was modest in the third quarter. With a strong pipeline, loan growth is expected to accelerate. The third-quarter loan

growth was primarily from commercial real estate loans and is net of \$1 million in SBA loans sold.

- Total Deposits were up \$21 million from June 30, 2017 and up \$52 million from September 30, 2016. \$14 million of the third-quarter deposit growth came from non-interest bearing deposits, which is reflected in the 2.37% increase to 41.39% in the non-interest bearing to total deposits ratio. New relationships represented a greater portion of the deposit increase this quarter.
- Credit Quality remains strong and stable with no non-accrual loans and no nonperforming assets. Loan loss provision expense for the third quarter was \$100,000. The allowance for loan and lease loss reserve ratio was 1.38% at September 30, 2017, increasing from 1.35% at June 30, 2017.
- Book value per share increased to \$16.01 per share at September 30, 2017 from \$15.68 at June 30, 2017 and \$14.89 per share at September 30, 2016.
- The Bank continues to be well-capitalized with a Tier 1 Leverage Ratio of 8.85%, Tier 1 Risk Based Capital and Common Equity Tier 1 ratios of 12.87% and a Total Risk Based Capital ratio of 14.12%.
